DETAILED ACTION

1. Applicant's election with traverse of Group I, Specie III (claims 1-7, 9-11, and 13) in Paper No. 12 is acknowledged. The traversal is on the ground(s) that Examiner has not applied the appropriate standard in the determining whether more than one invention is presented by the claims of the present application by the PCT rules. This is not found persuasive because this application is deemed to lack of unity of invention, Group II teaches a method of manufacturing a multi-chip module that can be used in vary processes, for example: coating, sputtering processes instead of using metallisation or photo-lithographic processes.

The requirement is still deemed proper and is therefore made FINAL. Claims 8, 12, and 14-20 are withdrawn from further consideration as being drawn to elected subject matter.

Specification

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)),

Art Unit: 2827

and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or

REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)

(e) BACKGROUND OF THE INVENTION.

(1) Field of the Invention.

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

(f) BRIEF SUMMARY OF THE INVENTION.

(g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

(h) DETAILED DESCRIPTION OF THE INVENTION.

(i) CLAIM OR CLAIMS (commencing on a separate sheet).

(j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

(k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 3 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 3, it is unclear. The phrase of "the ratio of the height...to 130" is not understood.

4. Claim 7 recites the limitation "the signal connection contact surfaces (3)" in 3.

There is insufficient antecedent basis for this limitation in the claim.

Art Unit: 2827

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-3, and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Baur et al. (U. S. Patent 6,129,560, hereafter Baur).

As to claims 1, 3, Baur discloses in figures 1-10 a plug-socket connector C capable of being a mufti-chip-module with a base carrier (5-figure 1, column 4, line 16),

at least in some areas signal conductor tracks (1, column 4, line 15) arranged at least in a single layer and signal contact surfaces are arranged, and

at least one semiconductor component (10-figure 1, column 4, line 16) connected with signal conductor tracks (1) and signal contact surfaces operating in the signal range, wherein

additionally on the base carrier (5) at least in some areas (3-figure 1) power conductor tracks (22of plug SI) and power contact surfaces (7) are arranged in at least a single layer, at least one power electronics component (plug SII) operating in the power range is provided, which is connected with at least one power conductor track (22), at least one power contact surface (7) and at least one signal conductor track (1) and the power conductor tracks (22) have a larger cross section than the signal conductor tracks (1) at least on the basis of greater thickness dimensions,

Application/Control Number: 09/936,962

Art Unit: 2827

As to claim 2, Baur discloses the module as shown in figures 1-10 wherein the at least one signal conductor track (1) leading to a power electronics component (SII) essentially seamlessly verges into a power conductor track (22).

As to claim 6, Baur discloses the module as shown in figures 1-10 wherein at least one power conductor track (22) merges into several power contact surfaces (7) for the common contacting of a power electronics component (SII).

Allowable Subject Matter

- 7. Claims 4-5, 9-11, and 13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 8. Claim 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

9. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Wilson, Lusby, and Klosowiak et al. disclose related art.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T Dinh whose telephone number is 703-306-5856. The examiner can normally be reached on M-F.

Application/Control Number: 09/936,962

Art Unit: 2827
